Arab Association of Urology

Urological Association of Asia

Sechenov University

Bashkir State Medical University of the Ministry of Health of the Russian Federation

Dear Colleagues,

The Federal State Budgetary Educational Institution of Higher Education Bashkir State Medical University of the Ministry of Health of the Russian Federation plans to hold **The International Congress on Fundamental and Clinical Urology and Urooncology in Ufa from March 21 to March 23, 2024.**

The event is held under the auspices of the Ministry of Health of Russia, Association of Sino-Russian Medical Universities, Russian Society of Urologists, Arab Association of Urology, Urological Association of Asia, Société Internationale d'Urologie, Sechenov University, Bashkir State Medical University.

The Congress will pay special attention to experimental urological and urooncological research where outstanding international experts will present their latest fundamental and practical results. In particular, we will discuss a new generation of model systems (organoids obtained from patients, xenografts, mouse models) and their application to decipher the mechanisms that cause urological and oncurological diseases and treatment resistance, as well as their use in practical medicine. In addition, we will touch on current topics in the field of urological research, which include combination therapy, infections, immunity and the microbiome: from mechanisms to therapeutic possibilities.

The Congress will be attended by experts, leading specialists in the field of urology, oncurology and other related fields of medicine, recognized leaders of the world community from China, Serbia, Jordan, Romania, Georgia, Turkey, Canada, Germany, Korea, India, Mexico, Pakistan, Kazakhstan, Tajikistan, Uzbekistan, Malaysia, Kenya, Egypt, Nepal, Oman, UAE, Jordan, Nigeria, Tunisia and other European and Asian countries.

The purpose of the Congress is to strengthen business partnership between the Russian, European, Asian and Arab urological communities. The participants of the Congress will have the opportunity to learn from the unique experience of advanced scientific research, treatment and diagnosis of diseases of the genitourinary system in Europe, Russia, and the Asia-Pacific Region, as well as to familiarize themselves with modern trends and the latest achievements in the field of urology, oncurology and related sciences.

The Congress program includes topical issues facing doctors in their daily practice. The main directions of the congress will be grouped into thematic sessions, the task of which is to study the updated research results and practical experience of medical centers of the Russian Federation and abroad, as well as conducting open, endoscopic, laparoscopic and robotic surgery in the "live surgery" and "semilive surgery" modes, the training center for simulation surgery, WetLab.

The Organizing Committee offers you and your staff the opportunity to make thematic presentations in the Congress program and poster presentations on the topics of the Congress:

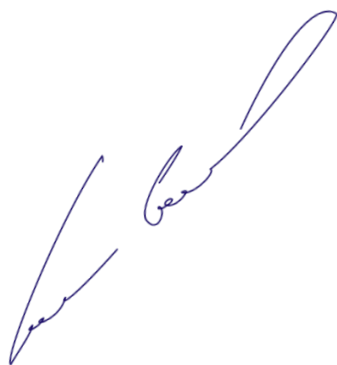

1. Genetic and immunological markers of urooncological diseases;
2. Mechanisms of carcinogenesis and tumor progression;
3. Innovative developments based on genetic technologies;
4. The effect of the epigenome on tumor progression;
5. Immunotherapy and genetics: current trends in urooncology;
6. Immunology and genetics in oncology: personalized therapy;
